

SPECIFICATION AMENDMENTS

Please amend the Specification as follows:

Page 15, 3rd Paragraph:

Herein, "amorphous polyester" is defined that polyester molecules ~~resins~~, a clear crystal structure which is not recognized by means of X-ray diffraction, occupy at least 50 mol wt % of the total component molecules ~~resins~~. More specifically, polyester molecules ~~resins~~, which have a crystallization degree of less than 0.1% occupy not less than 50% of the total component molecules ~~resins~~, are known as amorphous polyester.
